Projects:

Recruiter Extraordinaire

<http://recruiterextraordinaire.com>

New website developed for a client

PHP | MySQL | Ajax | JavaScript | TinyMCE

- Managed product lifecycle from scratch producing deliverables in under five weeks
- Developed PHP and MySQL backend
- Created password protected content management system allowing employees full CRUD control over job and article postings
- Incorporated TinyMCE with PHP for resume postings
- Integrated section for customer testimonials, giving client the option to screen, verify and approve content before it goes live to site

Infinite Image Scroller

[Github](#)

Users discover images based on keyword search

ReactJs | Unsplash API

- Developed image scroller using Unsplash API
- Requested API images are retrieved in increments of 20
- Utilize CSS Grid for responsive design

Secrete Family Recipe

[Github](#)

A website for users to create, store, and share recipies

ReactJs | NodeJs | Express | SQLite3 | KnexJS | Jest | Supertest

- Managed project from scratch using React, Express and NodeJs
- Developed database using SQLite3 with KnexJs query builder along with Jest and Supertest for testing
- Built user authentication with bcryptjs
